DETAILED ACTION

1. The substitute specification filed 09/17/2001 has not been entered because it does not conform to 37 CFR 1.125(b) and (c); because neither a statement that the substitute specification includes no new matter, nor a marked up version showing all the changes in the substitute specification has been found, MPEP 608.01(q).

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a thin film magnetic head, classified in class 360, subclass 126.
- II. Claims 14-17, drawn to a method of fabricating of a thin film magnetic head, classified in class 29, subclass 603.14.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the thin film magnetic head can be made without the particular "plating" step cited in claim 14 of Group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
